

Online Banking SmartAlerts are available when changes are made to your account.

Stay on top of your account information by simply entering a preferred email address or mobile phone number, select when you'd like to be notified and the way you'd like to be alerted.

Select **Settings** then **Smart Alerts** to choose how you'd like to be kept informed of activity on your account. There are options to be alerted at your next log on, by text message, email, on all three.

Security Alerts will help in keeping track of a change in ID and password changes even when they are not successful.

Choose from **Event alerts** such as an expiring or failed transfers, a change of address, incoming ACH credit or debit, or even be reminded when your loan payment is due.

Balance alerts will keep you in the know of when the balance of your account is below or above an amount you choose.

Transaction alerts will pinpoint any amount you select when removed from your account

Event Alerts – select the option and how you'd like to be notified
